CENCOOR

Guangzhou Cencoore Electric Co.,Ltd.

ADD:613, Building A, No.1 Xin'an Road, Huangpu District, Guangzhou, China.

Email: Cencoore@aliyun.com

Tel: 86-13160858002, 86-20-89855957

Fax: 86-20-89855957

Official Website

Guangzhou Cencoore Electric Co., Ltd.

- The **most potential** brand in low voltage inverter market
- The **most growing** brand of automation in China
- Annual capacity: **500000** sets of inverters

BrandStrength

- 187** intellectual property rights have been obtained (26 invention patents, 59 utility model patents, 34 design patents and 68 software copyrights)
- Focus on motor drive control for **15** years (Master the leading technology of high performance variable frequency vector control and motion control.)

CoreTechnology

- It has provided drive and control solutions for more than **1.5 million** motors worldwide.
- Implement local service strategy, more than **15** liaison offices, more than **80** service outlets.

FirstClassService

Guangzhou Cencoor Electric Co., Ltd. is a state-certified private high-tech enterprise as well as a software enterprise recognized by Shenzhen Science and Technology and Information Bureau. Since its establishment, the company specializes in the development, production, sales and service of industrial automation products. The main products are frequency converter, servo drive and system, soft starter, electric vehicle motor controller, solar photovoltaic inverter and pump controller, inverter, man-machine interface, programmable controller, power supply system, power supply products. At present, its marketing network is located in many countries and regions along the "one belt and one road" both at home and abroad.

T200 Mini Variable-Frequency Drive

Power range: single-phase power supply (200-240V): 0.4-1.5kW; three-phase power supply (380-480V): 0.75-2.2kW

T200 mini Variable-Frequency Drive is positioned as a common application of small power OEM matching market, adopting vector V / F control technology. This series of Variable-Frequency Drive have many common functions, such as PID, multi-stage speed, DC braking, MODBUS communication, etc., with complete functions and smaller volume, which can further reduce the installation space.

• V/F control

• 5 circuits DI, 1 circuit AI,
1 relay control

• Exquisite figure,
compact structure

■ Technical Specification Table

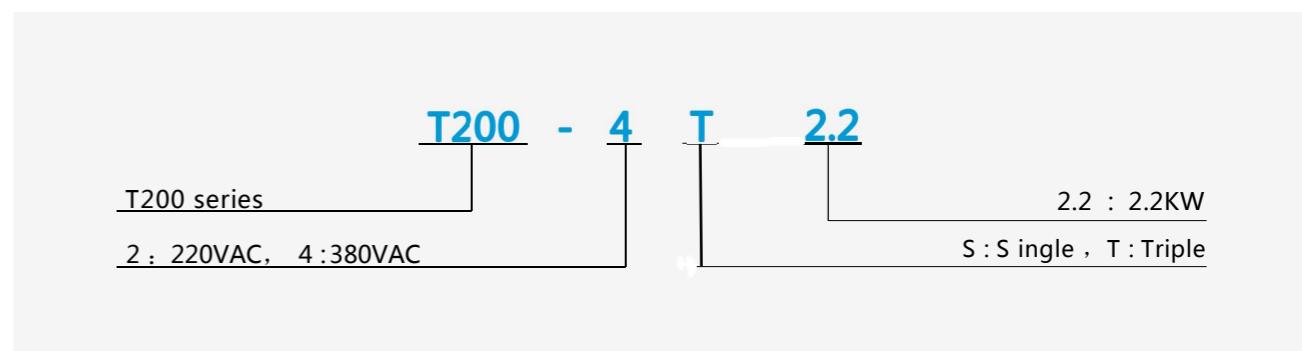

| | |
|------------------------------|--|
| Control mode | V/F |
| Starting torque | 0.5Hz / 150% (V/F) |
| Speed regulation range | 1 : 100 |
| Speed stabilization accuracy | ±0.5% |
| Overload capacity | 150% rated current 60s; 180% rated current 3s |
| Input voltage range | 220V/380V ± 1.5% |
| Input frequency range | 50/60Hz. Frequency fluctuation range: ± 5% |
| Output voltage range | 0-220V, 0-415V |
| Output frequency range | 0 ~ 320Hz |
| AI | 1 circuit, 1 circuit 0-10V (4-20mA) |
| DI | 5 circuits |
| AO | Null |
| DO | Null |
| Delay output | 1 circuit (Normally open) |
| RS485 interface | 1 circuit |
| Powersupply | 1 circuit 10V |
| Altitude | Lower than 1000m, if it is higher than 1000m, the derating will be 1% for every 100m increase. |
| Ambient temperature | -10°C ~ +40°C (the ambient temperature is 40°C - 50°C, please derate in use) |
| Humidity | Less than 95% RH, no water condensation. |
| Vibration | Less than 5.9 m/s² (0.6g) |
| Storage temperature | -20°C ~ +60°C |

■ Applications

Woodworking machinery, food packaging, electronic equipment, logistic equipment, and other small power transmission occasions.

T510 Series General Purpose Inverter

Power range: single-phase power supply (200~240V) : 0.4~2.2kW; three-phase power supply (380~480V) : 0.75~37kW

T510 series inverter adopt speed sensorless vector control technology, the product has excellent driving performance and control functions; the product has rich hardware configuration, powerful software functions, and has a greater improvement in ease of use and reliability, which can better meet the different needs of various industrial control occasions. T510 series 0.75~22kw built-in standard braking unit, 30~37kw selected built-in braking unit, the whole series of independent duct design, improve product reliability and performance, enhance product competitiveness.

- SVC/VF control

- 6 circuits DI, 3 circuits AI, 2 circuits relays

- High reliability design

T600 Series High Performance Vector Inverter

Power range: single-phase power supply (200~240V) : 0.4~2.2kW; three-phase power supply (380~690V) : 0.75~1250kW

T600 series high performance vector converter which can be widely used in speed control of asynchronous motor/synchronous motor. The product adopts the international leading vector control algorithm to achieve high performance and high precision motor drive control, which strengthens the design of customer ease of use and industry specialization. It has more optimized functions, more flexible application and more stable performance.

T600-E Series Permanent Magnet Synchronous Drive

Power range: Three phase power supply (380V) : 0.75~800kW

T600-E series is a general-purpose high-performance current vector driver, which is mainly used to control and adjust the speed and torque of three-phase AC synchronous motor. It adopts high-performance vector control technology, low-speed and high torque output, with good dynamic characteristics, super overload capacity, user programmable function, background monitoring software, communication bus function, supporting a variety of PG cards, etc. The combination function is rich and powerful, and the performance is stable. It can be used to drive all kinds of automatic production equipment.

Characteristic:

- It can realize the control of synchronous motor without encoder and popularize the synchronous motor;
- It can accurately identify the parameters of asynchronous induction motor and permanent magnet synchronous motor, and realize high-performance vector control.

• SVC/VF control

• 7 circuits DI, 3 circuits AI,
2 circuits relay

• High reliability design

■ Applications

Drive of various automatic production equipment

■ OverallDimension

SW60 Variable Frequency Constant Pressure Water Supply Controller

Power range: Three phase power supply (380V) : 0.75~800KW

SW60 multiple-unit pump variable frequency constant pressure water supply special controller, combined with the control requirements of multiple-unit pump variable frequency constant pressure water supply, adopts a seven inch touch screen HMI integrated control controller specially for multiple-unit pump variable frequency constant pressure water supply.

7-inch Touch Screen TFT Color Display

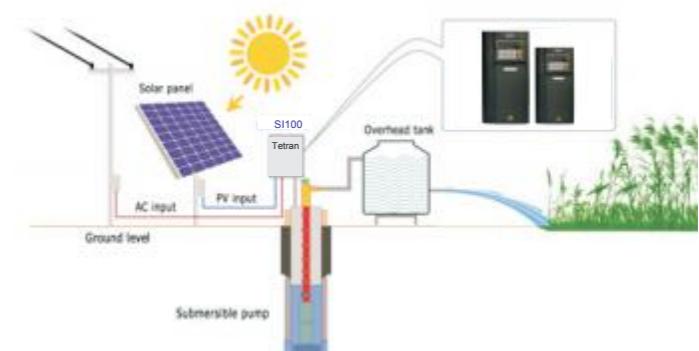

Automatic Control of 1-4 Water Pumps

SI100 Series Photovoltaic Water Pump Inverter

Power range: DC 180V~880V

SI100 series PV water pump special frequency converter adopts the core control algorithm of vector control frequency converter and combines the application control requirements of PV water pump to develop a special frequency converter for outdoor PV power supply. It has the control functions of maximum power tracking, light weak sleep, light intensity wake-up, high water sleep, under load warning and so on. According to the needs of customers, the power can be switched to the power grid to ensure the normal operation of the water pump.

■ Applications

Multiple-unit pump water supply and sewage treatment in living quarters and municipal engineering

■ Applications

Water pump for outdoor photovoltaic power supply
